

Academic poster production instructions

The poster presentation is to be executed in the English language and is required to follow a vertical format, with exact dimensions of **90cm in width and 120cm in height**. The title and content should possess independent conceptual designs, placing emphasis on brevity, clarity, a harmonious integration of textual and visual elements, aesthetically pleasing color schemes, and effective communication strategies. Elaborate textual explanations and intricate formula derivations should be avoided in the poster layout. Academic posters are anticipated to integrate crucial particulars such as institutional affiliation, research title, and the contributing author(s). Poster abstracts should be submitted through the conference website upon registration, with each poster being assigned a distinctive identification code by the organizing committee. **Participants are obligated to produce and bring their posters to the event venue, where a designated area for poster exhibition will be arranged, complete with the necessary installation tools.**
